

ComponentLoader

Class

Fields

AssemblyReferences : Hashtable

ClassReferences : IDictionary<string, IDynamicClassInfo>

ComponentRegistry : IDictionary<IDynamicClassSetup, IDynamicClassInfo>

instance : ComponentLoader

log : ILog

syncRoot : object

Properties

Instance { get; } : ComponentLoader

Methods

ClassExists(string paramClassName) : bool

ComponentLoader()

GetClassReference(string AssemblyName, string ClassName) : IDynamicClassInfo

GetClassReference(string paramClassName) : IDynamicClassInfo

InitClassRegistry() : bool

InitComponent(IDynamicClassSetup ClassSetup, object[] paramArgs) : object

InvokeMethod(IDynamicClassInfo ClassInfo, string MethodName, object[] paramArgs) : dynamic

InvokeMethod(string AssemblyName, string ClassName, string MethodName, object[] paramArgs) : dynamic

ObjectHelper

Class

Methods

GetFieldValue(string fieldName, object paramObject) : object

GetPropertyValue(string propertyName, object paramObject) : object
